

XM Satellite radio is not broadcasting Howard Stern, we are talking traffic and weather. I do believe you can buy a weather radio from Radio Shack, what is the difference, and why is it an issue ? XM Satellite Radio is providing a great service, especially with it's variety of stations that I can't get in my area. I urge you to reject NAB's petition 04-160. I pay for the service that I want. Why isn't anybody going after Dish Network for offering SPICE TV, x-rated material ? We are talking about weather and traffic.
